

Making Wootton Greener

What you have told us.....

Recycling should be encouraged.

Street lights should be turned off after midnight.

More trees should be planted.

Make the village a plastic bag free zone.

Car sharing could be introduced to help reduce vehicle numbers on roads.

Ways of reducing village carbon footprint should be investigated with more efficient use of heating and lighting for example.

Wind farms are seen as good by some but a blot on landscape by others.

Other forms of generating energy should be looked into.

Making Wootton Greener

Responses from the Youth Club:

- **There is a desire to see the village 'plastic bag free'.**
- **Wind farms are seen as a possibility but there are land issues.**
- **We should be reducing our carbon footprints by reducing car use.**
- **There should be car free zones as a way of reducing our carbon footprints.**
- **We should have more recycling bins in the village.**
